Flow Range (Note 1)

Ranges shown are standard ranges - other ranges are available. Contact Hoffer Flow Controls Applications Group.

Bearing Selection:

Hybrid Ceramic, Self-lubricating shielded ball bearings must be used on CO2, may be used on H2O and never on H2O/Sand or CS. Hard Carbon Composite Sleeve bearings. For use on H2O only.

Tungsten Carbide Sleeve bearings must be used on H2O/Sand and CS, may be used on H2O and never used on CO2.

Please Note: Flowmeter service life is reduced when flows contain particulate.

GENERAL SPECIFICATIONS
